## WEATHER — OKC

99°F / 73°F • Mostly clear, 1% chance of rain. Wind 7mph. An ordinary Oklahoma day — nothing dramatic on the forecast.

UV index 8 • Air quality: Good (AQI 42)

**Primoscapes note:** soil conditions look workable today — decent window for general bed prep. Water deep and infrequent, not daily — trains roots down where it stays cool.

## FIELD NOTES

Mental model — the Sunk Cost Fallacy: past investment of time or money isn't a reason to continue something. Judge only the path forward from here, as if starting fresh today.

## NURSERY NOTES

A newborn's stomach holds about a marble's worth at birth, a cherry's worth by day 3. Frequent small feeds aren't a feeding problem — that's just the actual size of the tank.

## VOCABULARY EXPANSION
