

# JOSH STOKESBERRY

Billing Operations & Strategy | Financial Controls | Reconciliation | Crypto-Native Operations  
Oklahoma City, OK | Remote (US) | stokesberryjosh@gmail.com | 405-343-4072

Financial operations professional with 6+ years at S&P Global facilitating \$10B+ in institutional trade workflows. Experienced in high-volume transaction tracking, reconciliation-minded exception resolution, escalation handling, daily operational reporting, and process improvement across complex multi-party financial workflows. Published S&P Global crypto research contributor and hands-on DeFi user — a controls-oriented operator who understands both institutional billing discipline and the crypto-native systems Coinbase customers live in.

## COINBASE ROLE ALIGNMENT

---

**Billing & Reconciliation Ops** — high-volume transaction monitoring, exception triage, reconciliation mindset, documentation and funding accuracy, aging-item resolution, operational controls.

**Controls & Escalation** — time-sensitive escalation management across clients, counterparties, and internal teams in regulated institutional infrastructure; audit-aware workflow discipline.

**Crypto Fluency** — hands-on DeFi user (Aave, Curve, Convex, Pendle, Aerodrome); published S&P Global research on oracle risk, crypto/AI, and blockchain interoperability/tokenization.

**Tools** — ClearPar, WSO, Excel (advanced), process documentation, SQL/Trino exposure, Python/Pandas foundations, JSON/API concepts.

## PROFESSIONAL EXPERIENCE

---

**S&P Global | Financial Operations Analyst** Dallas, TX / Remote | Oct 2019 – Present

- Facilitated \$10B+ in primary and secondary syndicated loan trade workflows through ClearPar and WSO, supporting institutional bank, asset manager, and fund management clients.
- Managed daily status tracking across high-volume portfolios, balancing execution speed, accuracy, settlement risk, documentation status, funding requirements, and client communication.
- Triaged operational exceptions and escalations, coordinating counterparties, custodians, agent banks, and internal teams to resolve blockers under time-sensitive conditions.
- Led analyst coverage for multiple client portfolios, prioritizing urgent workflows, escalating high-risk exceptions, and maintaining clear operational visibility across complex queues.
- Supported reporting visibility and process improvements that reduced ambiguity around aging transactions, status accuracy, and documentation readiness — a reconciliation-and-controls discipline directly applicable to billing operations.

**Ames Energy Partners | Data Analyst & Mineral Rights Buyer** Oklahoma City, OK | May 2018 – Aug 2018

- Compiled, organized, and analyzed land and mineral-rights data across multiple platforms to support acquisition targeting, transaction evaluation, and deal review.

## CRYPTO RESEARCH & DEFI EXPERIENCE

---

- Published S&P Global crypto research contributor: "Utility at a Cost: Assessing the Risks of Blockchain Oracles," "Crypto and AI: Shaping the Future of the Internet," and "Secure Blockchain Interoperability Supports Growth of Tokenization in Financial Markets."
- Hands-on DeFi user across Aave, Curve, Convex, Pendle, and Aerodrome with a risk-first lens on liquidity, collateral mechanics, incentives, governance, and operational controls.
- Built an AI-assisted operations command center on Git-based workflows (scheduled agents, Python-scripted reporting) — working Python/Pandas and SQL foundations sharpened daily.

## TOOLS & KNOWLEDGE AREAS

---

ClearPar | WSO | Excel | reconciliation & exception management | escalation & stakeholder coordination | operational controls | process documentation | Dune/SQL concepts | Python/Pandas foundations | JSON/API concepts | block explorers | stablecoins & crypto payments concepts

## EDUCATION

---

University of Oklahoma — B.B.A., Entrepreneurship & Venture Management; Minor in Finance | May 2019
